

Reynaers
Aluminium

Engineered for Space. Designed for Living

Belgian Heritage: Authentic European Excellence

Reynaers Aluminium is a leading European specialist in architectural aluminium systems, recognised for its commitment to design, performance and innovation. Designed, engineered and manufactured in Europe, its solutions reflect the highest standards of quality, precision and long-term reliability.

With over five decades of expertise, Reynaers works closely with architects and developers to deliver systems that meet the evolving demands of contemporary architecture. From windows and doors to advanced façade and sliding solutions, each system is developed with a focus on technical performance, sustainability, and seamless integration into modern living environments.

SlimLine 68

Elegant for Everyday Comfort

A high-performance slim aluminium profile designed for everyday comfort, combining daylight optimization with strong thermal insulation and superior weather resistance.

- Water Tightness: up to E1200
- Wind Load Resistance: Class C5
- Maximum Insulation: 1.1W/m²K

SlimLine 38

Architectural Steel-Look Elegance

Deep-profile system engineered for steel-look aesthetics, supporting larger spans with advanced insulation performance and refined detailing for design-led statement architecture.

- Minimalist steel-look architectural system
- Heritage aesthetic with multiple design variants

Variants		Classic SlimLine 68	Classic SlimLine 38
Min. Visible Width Outward Opening Window	Frame	11 mm	35 mm
	Vent	50 mm	60.5 mm
Overall System Depth Window	Frame	68 mm	99 mm
	Vent	68 mm	86 mm
Rebate Height		14/18 mm	13.5 mm
Class Thickness		Up to 32 mm	Up to 55 mm

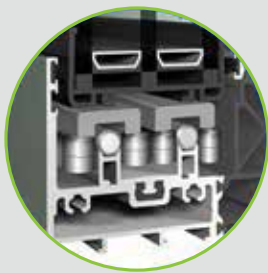

Hi-Finity

Design to Disappear

Hi-Finity transforms the way space is experienced. It elevates spatial living through ultra-slim frames and expansive glazing, creating a seamless sense of openness while introducing light, openness and timeless architectural sophistication.

- Panel weight up to 600kg per sash
- Maximum height up to 4m
- Ultra-slim interlock sightline of ~35mm
- Structural glazing with minimal visible profiles
- Multi-track configuration for large-span openings or corner opening

An advanced sliding technology designed to extend the seamless spatial experience of Hi-Finity with greater fluidity and ease.

Magnetic Slider

Building on the Hi-Finity system, Magnetic Slider introduces advanced magnetic technology that allows manual operation of extremely large, heavy sliding panels to glide with exception ease. By reducing friction, it delivers a smooth and controlled motion while preserving the system's minimalist design.

Reynaers | Where Light, Space and Engineering Converge

Rooted in Belgian heritage and shaped by European engineering, Reynaers Aluminium transforms the way space is experienced. Its architectural systems unite light, performance and timeless design in a refined balance of technical precision and enduring sophistication.
